Krisma H A

Faretti orientabili, singoli o doppi, per lampade alogene a tensione di rete con adattatore, per binario trifase (Eutrac). Corpo faretto in alluminio pressofuso. Dispositivo di limitazione delle rotazioni. Le astine cromate, fissate al corpo, consentono il montaggio di una serie di accessori.

Single or double line voltage adjustable spotlights for halogen lamp, fitted with adapter, for three-circuit track (Eutrac). Body of the spot in die-cast aluminium. Once adjusted, spotlights can be locked into place. Two chrome stems, fixed on the body, allow the mounting of various accessories.

Orientierbaren Einfach-, oder Doppelstrahler mit Adapter, für 3-Phasen-Hochvoltschiene (Eutrac). Für Halogenlampen (R7s). Leuchtenkörper aus fließgepresstem Aluminium. Der Strahler ist mit einem Überdrehungsschutz ausgerüstet. Zwei seitliche Chromstangen ermöglichen die Befestigung der optionalen Zubehörteile.

Spots orientables, à un ou deux réflecteurs, pour lampes halogènes à tension normale du réseau avec adaptateur, pour rail triphasé (Eutrac). Corps du spot en aluminium extrudé/moulé. Dispositif de limitation des rotations. Les tiges chromées, fixées au corps, permettent le montage d'une série d'accessoires.

Een/dubbele richtbare spots met spanning, met adaptor voor driefazige rail (Eutrac). Voorzien voor halogeenlampen. Reflector in gietaluminium aluminium. Blocagesysteem voor rotatie. 2 chrome stangen aan toestel bevestigd om accessoires te monteren.

Focos orientables, individuales o dobles, a tensión de red con adaptador a riel trifásico (Eutrac). Utilizan como focos luminosos bombillas halógenas. Cuerpo proyector en presofusión de aluminio. Dispositivo de limitación de la rotación.

Faretti orientabili, singoli o doppi, per lampade alogene a tensione di rete, con tige da 60 cm completi di adattatore, per binario trifase (Eutrac). Corpo faretto in alluminio pressofuso. Dispositivo di limitazione delle rotazioni. Le astine cromate, fissate al corpo, consentono il montaggio di una serie di accessori.

Single or double line voltage adjustable spotlights for halogen lamp, fitted with 60 cm stem and adapter, for three-circuit track (Eutrac). Reflector body in die-cast aluminium. Once adjusted, spotlights can be locked into place. Two chrome stems, fixed on the body, allow the mounting of various accessories.

Orientierbare Einfach-, oder Doppelstrahler mit 60 cm Rohrpendel und Adapter, für 3-Phasen-Hochvoltschiene (Eutrac). Für Halogenlampen. Leuchtenkörper aus fließgepresstem Aluminium. Der Strahler ist mit einem Überdrehungsschutz ausgerüstet. Zwei seitliche Chromstangen ermöglichen die Befestigung der optionalen Zubehörteile.

Spots orientables, à un ou deux réflecteurs, pour lampes halogènes à tension normale du réseau avec tige de 60 cm et adaptateur, pour rail triphasé (Eutrac). Corps du spot en aluminium moulé. Dispositif de limitation des rotations. Les tiges chromées, fixées au corps permettent le montage d'une série d'accessoires.

Een/dubbele richtbare spots met spanning, met stang 60 cm en adaptor voor driefazige rail (Eutrac). Voorzien voor halogeenlampen. Reflector in gietaluminium aluminium. Blocagesysteem voor rotatie. 2 chrom stangen aan toestel bevestigd om accessoires te monteren.

Focos orientables, individuales o dobles, a tensión de red con tija de 60 cm y adaptador a riel trifásico (Eutrac). Utilizan como focos luminosos bombillas halógenas. Cuerpo proyector en presofusión de aluminio. Dispositivo de limitación de la rotación. Dos barras cromadas fijadas al cuerpo permiten el montaje de los accesorios.

Krisma IM A

Faretti orientabili, singoli o doppi, ad alogenuri metallici con alimentatore incorporato, completi di adattatore, per binario trifase (Eutrac). Corpo faretto e gruppo di alimentazione in alluminio pressofuso/estruso. Dispositivo di limitazione delle rotazioni. Le astine cromate, fissate al corpo, consentono il montaggio di una serie di accessori. Grazie ad un sistema di fissaggio azionato dall'esterno, i gruppi di alimentazione possono essere posizionati su binario senza dover aprire l'apparecchio. Per uniformità di design e finitura, l'adattatore è rivestito da un carter facilmente applicabile.

Single or double adjustable metal halide spotlights, with integral control gear fitted with adapter, for three-circuit track (Eutrac). Body of the spot and control gear box of extruded/die-cast aluminium. Once adjusted, spotlights can be locked into place. Two chrome stems, fixed on the body, allow the mounting of various accessories. Thanks to a fixing system operated from the outside, the power feed can be placed on the track without opening the spotlight. To ensure uniformity of design and finish, the adaptor is supplied with a cover.

Orientierbarer Einfach-, oder Doppelstrahler für Hochdruckmetaldampflampen mit Vorschaltgerät und Adapter, für 3-Phasen-Hochvoltschiene (Eutrac). Leuchtenkörper aus Aluminiumdruckguss. Asymmetrischer Reflektor. Der Strahler ist mit einem Überdrehungsschutz ausgerüstet. Zwei seitliche Chromstangen ermöglichen die Befestigung der optionalen Zubehörteile. Dank eines von außen zugänglichen Befestigungssystems können die Vorschaltgeräte ohne Öffnen des Gehäuses an der Schiene positioniert werden. Durch einheitliches Design und Farbe der Versorgungseinheit und des Adapters fügen sich die Stromschienenversionen harmonisch ein.

Spots orientables, à 1 ou 2-spots, pour lampes à iodures métalliques avec groupe d'alimentation incorporé et adaptateur pour rail triphasé (Eutrac). Corps du spot et boîtier en aluminium extrudé/moulé. Dispositif de limitation des rotations. Les tiges chromées, fixées au corps permettent le montage d'une série d'accessoires. Grâce à un système de fixation actionné depuis l'extérieur, les alimentations peuvent être positionnées sur le rail sans devoir ouvrir l'appareil. Pour assurer l'uniformité du design et de la finition, les groupes d'alimentation et l'appareillage électrique sont recouverts d'un carter facilement applicable.

Een/dubbele richtbare spots voor metaalachtige jodide gloeilamp, met adaptor, voor driefazige rail (Eutrac). Voedingsgroep inbegrepen. Spot en doos in gevormd/geëxtrudeerd aluminium. Blocagesysteem voor rotatie. 2 chrome stangen aan toestel bevestigd om accessoires te monteren. Dankzij een fixatie systeem, in beweging gebracht van buiten uit, kunnen de voedingen op de rail geplaatst worden zonder het toestel te openen. Om de uniformiteit van de afwerking en design te verzekeren, zijn de adaptors en de voorschakelapparatuur omringd met eenvoudig te bevestigen carter.

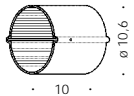

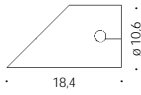

Focos orientables, individuales o dobles, con grupo de alimentación incorporado y adaptador a riel trifásico (Eutrac). Utilizan como focos luminosos bombillas a descarga de alogenuros metálicos. Foco y grupo de alimentación en aluminio estruso/presofuso. Dispositivo de limitación de la rotación. Dos barras cromadas fijadas al cuerpo permiten el montaje de los accesorios. Gracias a un sistema de fijación accionado desde el exterior, los grupos de alimentación pueden ser colocados en el rail sin tener que abrir el aparato. Para la uniformidad de diseño y acabado, en los grupos de alimentación para rail, el adaptador está revestido de un carter fácilmente aplicable.
